

CS-10TFWA

Semi-Automatic Sheet Portioning

FOODTOOLS
Industry Leaders in Portion Control

CS-10TFWA

Average Speed:

50-100 Products Per Hour

Function:

This economical sheet cutting model slices a variety of frozen products in or out of the box/pan. The manual operation of indexing and automatic x/y axis rotation make it a great economical value to a lower production bakery or a new bakery product just being started. Bakeries cutting 50-100 products per hour find the best value in this machine.

Benefits

- Achieve a return on investment through labor savings and improved portion quality and consistency
- Perfectly portion sheet products every time no matter who is using the machine
- Accessories for different products or portion sizes can be changed in minutes making this machine incredibly versatile
- Remove risks and hazards of employees using knives to slice sheet products
- Machine can be run by a single person
- Reliable and durable equipment backed by manufacturer's warranty
